What is SAPBlox?

SAPBlox shows one version of the truth across decentralized systems, enabling insightful business decision powered by Blockchain.

How does it work?

SAPBlox is blockchain powered SAP solution that integrates with SAP BTP and can connect to any of the multiple Blockchain platforms in a way to write/retrieve verified and validated digital data that serves as a single-source of truth that can be used for effective decision making.

What makes it Unique?

- Plug & play SAP solution
- Extract verified data from multiple sources
- In-Built custom validations
- Smart contract developments

- Ability to connect to disparate business ERP
- Custom rules on top of existing rules
- Business dashboard solution

How you benefit?

Low Investment
A Blockchain solution without heavy investment no capital investment, flexible human capital investment.
